

TOV-AI Prompts

AI Prompts for tech transfer offices (TTOs) to enhance the efficiency and efficacy of TTO workflows.

AI technology is growing rapidly, and tech transfer offices (TTOs) have an opportunity to harness the power of AI to enhance their workflow efficiency and efficacy. NYU's TTO, Technology Opportunities & Ventures (TOV), has been successfully using AI to automate routine tasks and improve workflows, which has freed up staff from administrative burdens and allowed them to redirect their expertise toward strategic endeavors. TOV has worked hard to engineer AI prompts for optimized outputs and now we want to share those prompts with the TTO community.

Sample prompts in this document include:

- Letter drafting
 - License notice to cure
 - License termination letter
- Agreement summaries
 - Agreement to database
 - Sponsored research agreement review
 - Broad agreement review
- MTA JSON setup form

To accept the license to download and use these prompts, TOV requires approval from your organization's director of technology transfer.
